Subject Index of Volume 17

- Acidic properties
and catalytic properties of heteropoly compounds, 103
of Ge, Ti, Zr and Sn phosphates and arsenates, 161
of mixed transition metal oxides, 121
- Acidic solid material
unusual; niobic acid as, 217
- Acidity
surface, and catalytic activity of high-temperature evacuated AlPO_4 , 145
zeolite, dependence on structure and chemical environment; correlations with catalysis, 49
of zirconium oxide and sulphated ZrO_2 samples, 249
- Acid sites
structural identification of, of sulphur-promoted solid super acid and construction of its structure on silica support, 3
- Alcohol chain
polyvinyl; conformation of, at oxide/electrolyte interface, 293
- Aluminium
application of pore-filling method to study of structure of porous anodic films on, 285
 CO_2 laser annealing of Al-GaAs structure, 499
surface acidity and catalytic activity of high-temperature evacuated AlPO_4 , 145
- Amorphous substances
electrical transport properties of as-evaporated and annealed amorphous $\text{Ge}_x\text{Se}_{1-x}$ thin films, 343
- Annealing
 CO_2 laser, of Al-GaAs structure, 499
DC galvanomagnetic and thermoelectric effects in an undoped single crystal of n-type CdSe optimally annealed in molten Cd at high temperatures, 357
electrical transport properties of as-evaporated and annealed amorphous $\text{Ge}_x\text{Se}_{1-x}$ thin films, 343
- Anodic films
porous; application of pore-filling method to study of structure of, on Al, 285
- Antimony
growth of Sb_2S_3 single crystals by chemical vapour transport, 311
synthesis and thermal behaviour of gel-derived SnO_2 - Sb_2O_5 semiconducting glaze, 541
- Arsenic
acidic properties of Ge, Ti, Zr and Sn phosphates and arsenates, 161
 CO_2 laser annealing of Al-GaAs structure, 499
- Asbestos
influence of fibre pretreatment on mechanical properties of epoxy-asbestos composites, 453
transition properties of pretreated asbestos-filled epoxy polymers, 531
- Baeyer-Villiger oxidation
nafion- H^{R} catalyzed, and Ritter reaction, 21
- Barium
DSC study on phase transition of $\text{BaSm}_2\text{-Mn}_2\text{O}_7$ and $\text{BaEu}_2\text{Mn}_2\text{O}_7$, 585
- Cadmium
DC galvanomagnetic and thermoelectric effects in an undoped single crystal of n-type CdSe optimally annealed in molten Cd at high temperatures, 357
- Calcium fluoride
and hydroxyapatite and fluorapatite; surface free energies of, 553
- Carbides
estimation of carbon-metal interaction in, of *d*-transition metals, 391
- Carbon dioxide
laser annealing of Al-GaAs structure, 499
- Carbon-metal interaction
estimation of, in carbides of *d*-transition metals, 391
- Carbon monoxide
- low temperature IR probe for characterization of hydroxyl group properties on metal oxide surfaces, 201

Catalysis

- nafion-H^R catalyzed Baeyer-Villiger oxidation and Ritter reaction, 21
- zeolite acidity dependence on structure and chemical environment; correlations with, 49

Catalysts

- crystalline zirconium phosphate; structure and surface chemistry of, 181
- preparation of some rare earth oxide supported Rh catalysts; study of supports, 433
- two-component Friedel-Crafts, as solid super acids, 31

Catalytic activity

- and surface acidity of high-temperature evacuated AlPO_4 , 145

Catalytic properties

- and acidic properties of heteropoly compounds, 103

Ceramic(s)

- hardness testing of ceramic materials, 461
- magnetic materials; thermal diffusivity measurements by interferometric method on, 399
- relevant properties of ceramics for immobilization of high level waste; example: glass-ceramic through a sol-gel route, 475

Clay

- preparation and properties of titania pillared clay, 87

Cobalt

- electrical conductivity and defect structure of pure and Li-doped CoO at high temperatures, 567

Composite(s)

- electrolytes, 485
- epoxy-asbestos; influence of fibre pretreatment on mechanical properties of, 453

Conduction

- electrical, in manganese molybdate, 259

Conductivity

- electrical, and defect structure of pure and Li-doped CoO at high temperatures, 567

Conductors

- ionic; evaluation criteria about parasitics in impedance measurements of, 559

Corrosion

- V_2O_5 induced hot, 273

Crystals

- DC galvanomagnetic and thermoelectric effects in an undoped single crystal of n-type CdSe optimally annealed in molten Cd at high temperatures, 357

growth of Sb_2S_3 single, by chemical vapour transport, 311

structure and surface chemistry of crystalline zirconium phosphate catalysts, 181

Cubic phase

- new; structure of, in La-Th-Li-O system, 445

DC galvanomagnetic effects

- and thermoelectric effects in an undoped single crystal of n-type CdSe optimally annealed in molten Cd at high temperatures, 357

Defect ferrites

- new manganese; structural study of, 521

Defect structure

- and electrical conductivity of pure and Li-doped CoO at high temperatures, 567

Discharge currents

- thermally stimulated, in polyvinyl pyrrolidone polymer films, 317

DSC study

- on phase transition of $\text{BaSm}_2\text{Mn}_2\text{O}_7$ and $\text{BaEu}_2\text{Mn}_2\text{O}_7$, 585

Electrical conduction

- in manganese molybdate, 259

Electrical conductivity

- and defect structure of pure and Li-doped CoO at high temperatures, 567

Electrical transport properties

- of as-evaporated and annealed amorphous $\text{Ge}_x\text{Se}_{1-x}$ thin films, 343

Electrochemical polishing

- reflectivity and surface composition of electrochemically and mechanically polished stainless steel, 301

Electrochemical polymerization

- of O-phenylene diamine at surface imperfections and performance of sintered TiO_2-x electrodes, 227

Electrodes

- performance of sintered TiO_2-x , and electrochemical polymerization of O-phenylene diamine at surface imperfections, 227

Electrolyte(s)

- composite, 485
- /oxide interface; conformation of polyvinyl alcohol chain at, 293

Epoxy-asbestos composites

- influence of fibre pretreatment on mechanical properties of, 453

- Epoxy polymers
 - pretreated asbestos-filled; transition properties of, 531
- Europium
 - DSC study on phase transition of $\text{BaSm}_2\text{-Mn}_2\text{O}_7$ and $\text{BaEu}_2\text{Mn}_2\text{O}_7$, 585
- Ferrites
 - structural study of new manganese defect ferrites, 521
- Fibre pretreatment
 - influence of, on mechanical properties of epoxy-asbestos composites, 453
- Films
 - as-evaporated and annealed amorphous $\text{Ge}_x\text{Se}_{1-x}$ thin; electrical transport properties of, 343
 - polyvinyl pyrrolidone polymer; thermally stimulated discharge currents in, 317
 - porous anodic; application of pore-filling method to study of structure of, on Al, 285
- Fluorapatite
 - and hydroxyapatite and calcium fluoride; surface free energies of, 553
- Friedel-Crafts catalysts
 - two-component, as solid super acids, 31
- Gallium
 - CO_2 laser annealing of Al-GaAs structure, 499
- Gas sensors
 - tin oxide based, 571
- Gel
 - relevant properties of ceramics for immobilization of high level waste; example: glass-ceramic through a sol-gel route, 475
 - synthesis and thermal behaviour of gel-derived $\text{SnO}_2\text{-Sb}_2\text{O}_5$ semiconducting glaze, 541
- Germanium
 - acidic properties of Ge, Ti, Zr and Sn phosphates and arsenates, 161
 - electrical transport properties of as-evaporated and annealed amorphous $\text{Ge}_x\text{Se}_{1-x}$ thin films, 343
- Glass
 - relevant properties of ceramics for immobilization of high level waste; example: glass-ceramic through a sol-gel route, 475
- Hardness
 - testing of ceramic materials, 461
- Heteropoly compounds
 - acidic and catalytic properties of, 103
- Hydrogen
 - high temperature reduction kinetics of ilmenite by, 325
- Hydrolysis
 - of zirconium n-propoxide; reaction kinetics, 507
- Hydroxyapatite
 - and fluorapatite and calcium fluoride; surface free energies of, 553
- Hydroxyl group properties
 - on metal oxide surfaces; carbon monoxide - low temperature IR probe for characterization of, 201
- Ilmenite
 - high temperature reduction kinetics of, by hydrogen, 325
- Immobilization
 - relevant properties of ceramics for, of high level waste; example: glass-ceramic through a sol-gel route, 475
- Impedance measurements
 - evaluation criteria about parasitics in, of ionic conductors, 559
- Interface
 - oxide/electrolyte; conformation of polyvinyl alcohol chain at, 293
- Interferometric method
 - thermal diffusivity measurements by, on magnetic ceramic materials, 399
- Ionic conductors
 - evaluation criteria about parasitics in impedance measurements of, 559
- IR probe
 - carbon monoxide - low temperature IR probe for characterization of hydroxyl group properties on metal oxide surfaces, 201
- Lanthanum
 - structure of new cubic phase in La-Th-Li-O system, 445
- Laser annealing
 - CO_2 , of Al-GaAs structure, 499
- Lithium
 - electrical conductivity and defect structure of pure and Li-doped CoO at high temperatures, 567
 - structure of new cubic phase in La-Th-Li-O system, 445

Magnetic ceramic materials

thermal diffusivity measurements by inter-ferrometric method on, 399

Manganese

DSC study on phase transition of $\text{BaSm}_2\text{-Mn}_2\text{O}_7$ and $\text{BaEu}_2\text{Mn}_2\text{O}_7$, 585

electrical conduction in manganese molybdate, 259

structural study of new manganese defect ferrites, 521

Mechanical behaviour

and morphology of 1,2 polybutadiene – natural rubber blends, 415

Mechanical polishing

reflectivity and surface composition of electrochemically and mechanically polished stainless steel, 301

Mechanical properties

influence of fibre pretreatment on, of epoxy–asbestos composites, 453

Mechanochemical treatment

changes in physicochemical properties of α -spodumene by, 379

Metal oxide surfaces

carbon monoxide – low temperature IR probe for characterization of hydroxyl group properties on, 201

Molecular deformation

of polyethylene, 405

Molecular shape-selectivity

and preparation and characterization of CVD zeolite, 73

Molybdenum

electrical conduction in manganese molybdate, 259

Morphology

and mechanical behaviour of 1,2 polybutadiene – natural rubber blends, 415

Nafion-H^R

catalyzed Baeyer-Villiger oxidation and Ritter reaction, 21

Niobic acid

as unusual acidic solid material, 217

Nylon 66

effect of sterilising radiation on properties of, 239

O-phenylene diamine

performance of sintered $\text{TiO}_2\text{-x}$ electrodes and electrochemical polymerization of, at surface imperfections, 227

Oxidation

nafion-H^R catalyzed Baeyer-Villiger, and Ritter reaction, 21

Oxide

carbon monoxide – low temperature IR probe for characterization of hydroxyl group properties on metal oxide surfaces, 201

CO_2 laser annealing of Al–GaAs structure, 499

electrical conductivity and defect structure of pure and Li-doped CoO at high temperatures, 567

/electrolyte interface; conformation of polyvinyl alcohol chain at, 293

hydrolysis of zirconium n-propoxide; reaction kinetics, 507

mixed transition metal oxides; acidic properties of, 121

performance of sintered $\text{TiO}_2\text{-x}$ electrodes and electrochemical polymerization of O-phenylene diamine at surface imperfections, 227

preparation of some rare earth oxide supported Rh catalysts; study of supports, 433

synthesis and thermal behaviour of gel-derived $\text{SnO}_2\text{-Sb}_2\text{O}_5$ semiconducting glaze, 541

tin oxide based gas sensors, 571

V_2O_5 induced hot corrosion, 273

zirconium oxide and sulphated ZrO_2 samples; acidity of, 249

Oxygen

structure of new cubic phase in La–Th–Li–O system, 445

Parasitics

evaluation criteria about, in impedance measurements of ionic conductors, 559

Phase transition

DSC study on, of $\text{BaSm}_2\text{Mn}_2\text{O}_7$ and $\text{BaEu}_2\text{Mn}_2\text{O}_7$, 585

Phosphorus

acidic properties of Ge, Ti, Zr and Sn phosphates and arsenates, 161

structure and surface chemistry of crystalline zirconium phosphate catalysts, 181
surface acidity and catalytic activity of high-temperature evacuated AlPO_4 , 145

Physicochemical properties

changes in, of α -spodumene by mechanochemical treatment, 379

Polybutadiene

morphology and mechanical behaviour of 1,2- polybutadiene – natural rubber blends 415

- Polyethylene**
molecular deformation of, 405
- Polymer(s)**
polyvinyl pyrrolidone, films; thermally stimulated discharge currents in, 317
transition properties of pretreated asbestos-filled epoxy polymers, 531
- Polymerization**
electrochemical, of O-phenylene diamine at surface imperfections and performance of sintered TiO_2-x electrodes, 227
- Polyvinyl**
alcohol chain; conformation of, at oxide/electrolyte interface, 293
pyrrolidone polymer films; thermally stimulated discharge currents in, 317
- Porous anodic films**
application of pore-filling method to study of structure of, on Al, 285
- Radiation**
carbon monoxide - low temperature IR probe for characterization of hydroxyl group properties on metal oxide surfaces, 201
sterilising; effect of, on properties of nylon 66, 239
- Rare earth**
preparation of some rare earth oxide supported Rh catalysts; study of supports, 433
- Reaction kinetics**
hydrolysis of zirconium n-propoxide, 507
- Reduction kinetics**
high temperature, of ilmenite by hydrogen, 325
- Reflectivity**
and surface composition of electrochemically and mechanically polished stainless steel, 301
- Rhodium**
preparation of some rare earth oxide supported Rh catalysts; study of supports, 433
- Ritter reaction**
nafion- H^{R} catalyzed Baeyer-Villiger oxidation and, 21
- Rubber**
morphology and mechanical behaviour of 1,2-polybutadiene - natural rubber blends, 415
- Samarium**
DSC study on phase transition of $\text{BaSm}_2\text{-Mn}_2\text{O}_7$ and $\text{BaEu}_2\text{Mn}_2\text{O}_7$, 585
- Selenium**
DC galvanomagnetic and thermoelectric effects in an undoped single crystal of n-type CdSe optimally annealed in molten Cd at high temperatures, 357
electrical transport properties of as-evaporated and annealed amorphous $\text{Ge}_x\text{Se}_{1-x}$ thin films, 343
- Semiconducting glaze**
synthesis and thermal behaviour of gel-derived $\text{SnO}_2\text{-Sb}_2\text{O}_5$ semiconducting glaze, 541
- Silica support**
structural identification of acid sites of sulphur-promoted solid super acid and construction of its structure on, 3
- Sol-gel route**
relevant properties of ceramics for immobilization of high level waste; example: glass-ceramic through, 475
- Spodumene**
 α ; changes in physicochemical properties of, by mechanochemical treatment, 379
- Stainless steel**
electrochemically and mechanically polished; reflectivity and surface composition of, 301
- Sterilising radiation**
effect of, on properties of nylon 66, 239
- Sulphur**
acidity of zirconium oxide and sulphated ZrO_2 samples, 249
growth of Sb_2S_3 single crystals by chemical vapour transport, 311
structural identification of acid sites of sulphur-promoted solid super acid and construction of its structure on silica support, 3
- Super acid(s)**
solid; two-component Friedel-Crafts catalysts as, 31
sulphur-promoted solid; structural identification of acid sites of, and construction of its structure on silica support, 3
- Surface acidity**
and catalytic activity of high-temperature evacuated AlPO_4 , 145
- Surface chemistry**
and structure of crystalline zirconium phosphate catalysts, 181
- Surface composition**
and reflectivity of electrochemically and mechanically polished stainless steel, 301

- Surface free energies
 - of hydroxyapatite, fluorapatite and calcium fluoride, 553
- Surface imperfections
 - performance of sintered TiO_2-x electrodes and electrochemical polymerization of O-phenylene diamine at, 227
- Synthesis
 - and thermal behaviour of gel-derived $\text{SnO}_2\text{-Sb}_2\text{O}_5$ semiconducting glaze, 541
- Thallium
 - structure of new cubic phase in La-Th-Li-O system, 445
- Thermal behaviour
 - and synthesis of gel-derived $\text{SnO}_2\text{-Sb}_2\text{O}_5$ semiconducting glaze, 541
- Thermal diffusivity measurements
 - by interferometric method on magnetic ceramic materials, 399
- Thermoelectric effects
 - and DC galvanomagnetic effects in an undoped single crystal of n-type CdSe optimally annealed in molten Cd at high temperatures, 357
- Tin
 - acidic properties of Ge, Ti, Zr and Sn phosphates and arsenates, 161
 - synthesis and thermal behaviour of gel-derived $\text{SnO}_2\text{-Sb}_2\text{O}_5$ semiconducting glaze, 541
 - tin oxide based gas sensors, 571
- Titanium
 - acidic properties of Ge, Ti, Zr and Sn phosphates and arsenates, 161
 - ilmenite; high temperature reduction kinetics of, by hydrogen, 325
 - performance of sintered TiO_2-x electrodes and electrochemical polymerization of O-phenylene diamine at surface imperfections, 227
 - titania pillared clay; preparation and properties of, 87
- Transition metal oxides
 - mixed; acidic properties of, 121
- Transition metals
 - d-; estimation of carbon-metal interaction in carbides of, 391
- Transition properties
 - of pretreated asbestos-filled epoxy polymers, 531
- Vanadium
 - V_2O_5 induced hot corrosion, 273
- Vapour transport
 - chemical; growth of Sb_2S_3 single crystals by, 311
- Zeolite
 - acidity dependence on structure and chemical environment; correlations with catalysis, 49
 - CVD; preparation, characterization and molecular shape-selectivity, 73
- Zirconium
 - acidic properties of Ge, Ti, Zr and Sn phosphates and arsenates, 161
 - acidity of zirconium oxide and sulphated ZrO_2 samples, 249
 - hydrolysis of zirconium n-propoxide; reaction kinetics, 507
 - structure and surface chemistry of crystalline zirconium phosphate catalysts, 181
